

## First Responders Remote VTC & Video Recorder Suite

Azbell Electronics now offers an integrated VTC and Video recording solution, especially suited to First Responders, that allows unprecedented flexibility when: capturing, sharing, and recording video and audio data from a remote site.

Real time on-site high resolution video

The First Responder suite combines:

- the on-site data collection capability of the LIBERSTREAM ONSIGHT mobile collaboration system (wireless enabled HD video camera with two-way communications),
- a ruggedized Dell Laptop computer,
- a wireless access point linking the laptop to the camera via any local wireless network,
- plus a 120 Volt power supply integrated into a single, easily transported carrying case.

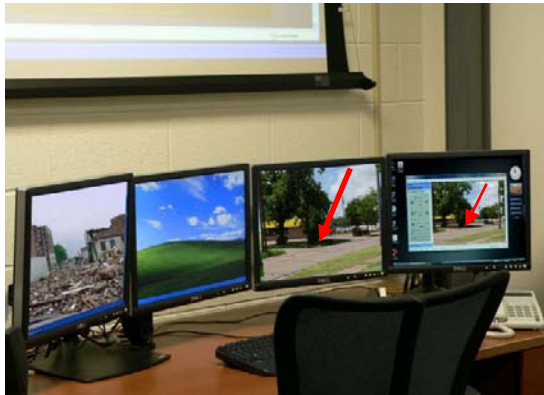

The suite is compatible with all standard wireless networks.

## First Responders Remote VTC & Video Recorder Suite

### Summary of features

<p>The high-resolution Video camera includes a touch sensitive screen, and built-in stylus, to annotate images shared with the laptop.</p> <p>The camera also includes full audio capabilities.</p>		
<p>Azbelle Electronics teams this camera with a ruggedized laptop that includes the same touch screen capability.</p> <p>The laptop links to existing wireless networks via the dedicated wireless access point.</p>		
<p>The entire suite is installed in a weather resistant carrying case that includes:</p> <ul style="list-style-type: none"> <li>• the charger for the Laptop battery,</li> <li>• an expanded battery 'slice' for the laptop,</li> <li>• a local USB wireless access device,</li> <li>• a 120VAC power outlet</li> <li>• and a cooling fan.</li> </ul>		
<p>The included ONSIGHT software provides for seamless high-speed exchange of data between the laptop and the camera. The camera's built-in webinar capability allows the ONSIGHT desktop video/audio capability be shared with <i>any other computer connected to the network.</i></p> <p>The laptop screen and camera view screen not only accept touch sensitive commands, but also allows users, at either device to annotate the shared images (i.e. add circles/arrows/notes that will appear on instantaneously on both devices).</p>		

Contact Azbelle Electronics for current prices and the latest specifications, as the capabilities of the camera and of the computer are continuously being expanded.

*For example, a 3G network solution can be selected that allows continuous two-way Video and Audio from a camera in Alaska to be shared with, and annotated by, a computer in Florida.*
